GIST OF THE CASE

Sri Sanjib Bhoi appeared in the Camp Court hearing held at ESO Office-Panchagaon, under SDO-Belpahar, on Dt. 19.12.2025. The complainant submitted during course of hearing in brief as follows:

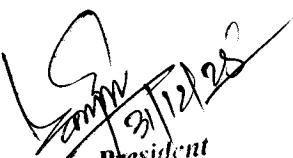

- 1) That reading in old meter was "459" on 11/11/2023, whereas bill was served on 08/11/2023 with reading "723". Consumer has produced snap shot of meter reading to this effect. So, incorrect and average billing for that period may be revised.

SUBMISSION OF OPPOSITE PARTY

The opposite party has submitted a Physical Verification Report carried out on 19.12.2025, photograph of meter with reading there on which was not clearly visible & written statement in this case. In reply to the case the opposite party submitted the following facts.

1. The date of power supply to the consumer is 05.12.2019.
2. As per the consumer complain he was served the bill of Jun'2023 with wrong meter reading of meter no."WLT165850" as the final reading of the meter was 459Kwh as on 11.11.2023 as per the evidence of Video & photo presented by the consumer in the GRF camp whereas the bill of Jun'2023 was served with meter reading 723Kwh as on 10.07.2023 and the above meter was replaced on 02.12.2023 where the MRT has given the FMR as 723 Kwh by citing the meter as Defective.
3. It is verified and found that the consumer's complaint is genuine as per the evidence presented by him and the meter report and PVR submitted by the ESO & AOC, Panchagaon.
4. The opposite party suggested that, the bill from Jun'2023 to Oct'2023 may be revised as per the monthly average consumption by taking IMR as "206" Kwh on Jun'2023 and FMR as "459"Kwh on Oct'2023 of meter no."WLT165850".

## OBSERVATION

The case is pursued with all documents available on record and merit of the case. The complainant is an existing consumer of electricity under the operational area of TPWODL bearing consumer No 4172-1302-3696, having CD-1KW under LT-DOMESTIC category, coming under ESO-Panchagaon & initial power supply effected on 05.12.2019. On scrutinizing the records in detail, the Forum observed the following facts which are envisaged here under that,

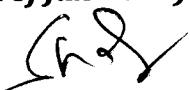

- 1) The date of initial power supply is 05/12/2019 with installed meter no. "WLT165850". Actual billing continued up to March-April/2022 duly adjusting the provisional bills in between.
- 2) From May-June/2022 to May-2023, inconsistent actual/provisional bills were served with remark 'reading not taken / not in use'.
- 3) In the month of June-2023, bill was served for 517 units with meter reading of '723'Kwh. Then average billing continued till November-2023 with remark "negative reading".
- 4) Consumer claimed that meter was working and as a proof he produced snapshot of meter reading "459" Kwh on date 11/11/2023.
- 5) A meter having sl. no "BT00005113" was installed on 02/12/2023 and then onwards actual bills are being served to till date.
- 6) Due to wrong reading punched by meter reader in the month of June-2023 and average billing raised for the subsequent period due to negative reading up to Nove-2023, EC bills need to be re-casted and revised accordingly.
